

[China Aluminum casting, Manufacturer, Supplier, Factory, Exporter in china](#)

Aluminum alloy is common light metal for casting process. Almost all casting processes can be available for aluminum alloy. The most overwhelming casting process for aluminum alloy is high pressure die casting process. As early to the 1950's, the aluminum high pressure die casting process has been introduced in to Ningbo area. Now there are thousands of die casting factories in Ningbo with different size. Ningbo Zhenhai Xinxie Machinery Co.,Ltd has a sister aluminum high pressure die casting factory in zhenhai district of Ningbo. They are supplying raw die casting parts for us. Thus we can control the high pressure die cast products from its initial fabricating steps till the final machined parts. You may also source other aluminum casting parts from us such as aluminum sand casting parts, aluminum gravity casting parts and aluminum low pressure die casting parts. All of these casting parts can be machined and even with value added treatments.
