

[China Forging parts, Manufacturer, Supplier, Factory, Exporter in china](#)

Forging is very traditional metal fabrication process. Once Ningbo Zhenhai Xinxie Machinery Co.,Ltd. set up in 1978, we offer post machining service for various kinds of forging parts.

With highly strict quality control and supplier selection, the metal forging products with post precise machining offer by Ningbo Zhenhai Xinxie Machinery Co.,Ltd. can meet the application in very critical mechanical field.

The material available for forging products range from iron, steel, aluminum, zinc, copper and etc.

Material: carbon steel, alloy steel, stainless steel, aluminum alloy, brass

Standard: ASTM, AISI, BS, DIN, JIS, NF

Process: investment casting, die casting, gravity casting, sand casting

Facilities: 300MT to 1,000MT friction press

Machining: turning, milling, drilling, grinding, threading, CNC machining, etc.

Finishing: sand blasting, polishing, plating, acid treatment, oxidation, painting and PVC powder coating

Inspection: coordinate measuring machine, optical comparator, surface indicator, chemical element analysis, hardness testing, tensile testing, impact testing
