

[China Precision machining, Manufacturer, Supplier, Factory, Exporter in china](#)

Ningbo Zhenhai Xinxie Machinery Co.,Ltd supplies custom-made machine parts to the exact specifications and expectations of its customers. Many of our customers have been with us for over 10 years which demonstrates the level of quality and service we offer.

Precision machining requires high performance in seven disciplines:

- 1) machine geometry and construction,
- 2) motion control,
- 3) thermal growth and environmental control,
- 4) spindle technology,
- 5) tooling selection and application,
- 6) machining strategy, and
- 7) real-time performance monitoring and correction. The cumulative effect of errors in these seven must not exceed 0.0005' over the workpiece volume. You can reduce significantly the impact on machining performance of the errors associated with each discipline.
